Subject: SB 274 Chemicals of High Concern to Children
Chair
Public Health Committee

I ask that you pay special attention to **SB 274 Chemicals of High Concern to Children**.

Because I am dashing off to a worksite, I will be brief.

Please support and enhance **any effort** to assist parents, grandparents, children and concerned uncles and aunts like myself, to be able to identify and have a choice when selecting products that will be used by children.

I also feel that resources must be allocated as part of any effort to identify these chemicals. The federal government has finally been allowed to review the hundreds of chemicals found in our nation's products via the TSCA (Toxics Substances Control Act) review, but Connecticut should not wait for Washington to "save" us.

Please consider every step, including labeling products, so that citizens can have a real choice when determining which items we want to have in our homes.

Thank you for your consideration and your work.
